General Information

Overview

This unit focuses on the management of chronic wounds of the foot. You will analyse the factors that enable identification of the high-risk foot. Prevalence of disorders that contribute to disease susceptibility will be considered, along with associated pathophysiological and neurological impacts. Biomechanical factors and client education associated with management and care of infection of the foot at risk for amputation/ulceration will also be considered in the context of prevention and ongoing client health.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE qualitative feedback

Feedback

Students queried the value and purpose of the 'Journal Club' component of the On-Campus Activity assessment item

Recommendation

It is recommended that the Unit Coordinator clearly articulates the mapping of the 'Journal Club' component of the On-Campus Activity assessment to the unit Learning Outcomes and the Professional Capabilities for Podiatrists in subsequent deliveries of this unit.

Feedback from SUTE qualitative feedback

Feedback

Updates to the design of the Written Assessment were well-received by students

Recommendation

It is recommended that the updated design of the Written Assessment continues to be used in subsequent deliveries of this unit.
