General Information

Overview

In today's competitive and fast-paced environment, learning to effectively manage a project is critical. In this unit, you will acquire the essential knowledge and essential skills to appropriately initiate and plan projects. The unit will prepare you to work on business cases, the organisation's historical information, previous projects' lessons learned and other project data to construct a project management plan. You will learn about and practice various processes in initiation and planning including project chartering, project scoping, and creating a work breakdown structure (WBS). In this unit, you will also learn about project stakeholders and management. In addition, you will identify a range of risk planning and quality management techniques. Finally, the unit introduces the concept of project integration and explores the role of the project manager in developing, implementing and maintaining the project plan while effectively managing change throughout the project life cycle.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from UC consultation with students during and outside the class (informal discussions, feedback during workshops, and email communication)

Feedback

Students reported a positive learning experience in the unit.

Recommendation

To continue enhancing the positive learning experience, multiple feedback sources (including informal in-class discussions and student comments during workshops) will be used alongside formal mechanisms to refine teaching practice. Interactive, student-focused activities will continue to be embedded, and a supportive and inclusive learning environment will be maintained.

Feedback from UC consultation with students during and outside the class

Feedback

Students found that attending weekly workshops enhanced their learning experience.

Recommendation

It is recommended to continue clearly communicating the benefits of attending weekly workshops and to actively encourage regular participation to further support students' academic progress and overall performance.

Feedback from UC observation

Feedback

Weekly communication with students is considered.

Recommendation

The Unit Coordinator will maintain regular weekly communication with students through a structured and multi-channel approach. This will include weekly announcement posts on Moodle outlining key content, upcoming assessments, and deadlines, supplemented by targeted email communication where individual follow-up is required. In addition, progress will be monitored through workshop attendance and informal in-class check-in, allowing early identification of any learning or engagement issues.
