Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Feedback from the student evaluation survey

Feedback

The lecturer was always available to provide useful and quick feedback on the unit and assessments criteria.

Recommendation

To ensure continuous and timely provision of feedback on all assessments to support ongoing student learning and development. Also, to encourage students to seek clarification when needed to reinforce understanding of the unit content and requirements.

Feedback from Feedback from the student evaluation survey

Feedback

Class discussions and quiz really helped us to engage and understand the content better. These activities made the class more interesting and encouraged everyone to participate

Recommendation

To continue incorporating class discussions and quizzes to enhance student engagement and understanding.

Feedback from Lecturers' feedback and reflection

Feedback

Although group formation was done early, some groups faced issues with non-contributing members who did not participate or attend tutorial discussions

Recommendation

The assessment structure has been designed to ensure both fair evaluation of teamwork and individual contribution. It consists of two components: Part A: A group-based submission Part B: final presentation, which is individually marked. This dual-component structure helps recognise collaborative efforts while also assessing each student's individual understanding and input. To support effective group collaboration, student participation and engagement will be actively monitored during tutorials. Students will be encouraged to contribute meaningfully to discussions and group activities, and tutors will provide guidance and support when challenges arise.
