General Information

Overview

This unit provides an introduction and overview of the field of practice known as complex project management. Complex project management is when a project has three characteristics. Firstly, complex projects are very complicated with lots of parts and interconnections. Secondly, there is a great deal of uncertainty. Finally, they are heavily time-constrained so there is little time to make decisions. In this unit you will explore these characteristics and how to manage them by undertaking assessments for complexity through analysis and systematic inquiry. You will investigate approaches to complexity by forecasting impacts and modelling outcomes. You will analyse the complexities of causes and effects, such as the role played by leaders, setting objectives, environmental and technological limitations and factors, and other constraints that increase complexity. In the unit you will be introduced to a number of examples of complex projects through case studies. You will be able to investigate and discuss the case studies with your peers and lecturers to increase your understanding and proficiency with the management of complex projects.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Survey - Students feedback

Feedback

As this is a core subject, it would be effective to have it at university. As with other terms, lectures have a positive impact on Zoom sessions. But when it comes to the workshop, it is highly effective in an in-class workshop. Mainly because this subject had all group assignments, we didn't have the opportunity to interact in person, which made it difficult to adjust everyone's schedules. But if the workshop is at a university, everyone will attend, and we'll have an opportunity to interact and perform better in our assessments

Recommendation

While most students are satisfied with online teaching, a few prefer face-to-face learning. To maintain consistency in delivery across campuses and for online students, the unit will continue to be offered online. However, to enhance interactive learning, students will be encouraged to share more actively and to engage more fully in collaboration.
