General Information

Overview

This unit will introduce you to the principles, processes, applications, and issues pertaining to the development and use of psychological assessment. This unit is presented through a number of themes, covering topics such as origins, ethics and uses of psychological testing; testing in adults, children and vulnerable populations; neuropsychological testing and testing for industry and career development. The psychometric basis of psychological assessment and testing is emphasised. You will focus on a variety of common psychological procedures and tests measuring individual differences. Consideration of individual differences and assessment in an Australian context will be a key component of your studies in this unit.
