General Information

Overview

In Exposures and Health Risk you will use current methods to analyse contemporary issues in occupational health and hygiene. The unit content will emphasise the role of toxicology, the nature of illness and injury caused by exposure to hazards and practical ways to assess risk. You will develop practical solutions for the advanced elimination and risk management of occupational health and hygiene hazards. On successful completion of this unit, you will be able to use a systems oriented approach to apply your knowledge to new issues of health risk as they arise in the workplace.
