General Information

Overview

In this unit you will examine statistics, with particular focus on applications to managerial decision making. You will use statistics techniques to make informed decisions in uncertain environments within the fields of business and accounting. You will analyse and interpret data, trends and patterns as well as make inferences and use probability theory to estimate risks. Other important topics of this unit include probability and forecasting.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Teaching team, Discipline Leader

Feedback

There is a small number of quiz questions which means there is limited opportunity for students to practice the same concepts across multiple questions.

Recommendation

Increase number of questions in question bank, especially adding variants (e.g., different case study or data set) for each concept covered.

Feedback from Teaching team, Discipline Leader

Feedback

While students are able to perform the necessary statistical calculations, some students find it difficult to develop an intuitive understanding of the concepts based on the calculations.

Recommendation

Create resources that allow students to visualise the operation of statistical methods on different data sets.
